PROFILE

Highly motivated Computer Science student passionate about solving real-world problems through software development. Experienced in building web and progressive web applications from requirements and UI design through development and deployment. Seeking opportunities to gain industry experience, collaborate with engineering teams and apply strong problem-solving skills to impactful projects.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, TypeScript, C#, C++, Dart, SQL

Web & Mobile: HTML5, CSS3, Tailwind CSS, React, React Native, Flutter, Vite

Backend & APIs: Supabase, Firebase, Google APIs, Web APIs, Authentication, Payment Integration

Software Engineering: Object-Oriented Programming, Data Structures, Algorithms, Cybersecurity, PWA Development

Tools & Technologies: Git, GitHub, Figma, Vercel, Cloudflare, AI Development Tools, AI Agent Integration

PROJECTS

Agri-Ally—Founder & Full-Stack Developer

React · Vite · Supabase · Google APIs · PayFast · Resend · Vercel

- Identified fragmentation between farmers and agricultural buyers, particularly around customer access, price transparency and market comparison.
- Designed and developed a functional Progressive Web App covering user onboarding, marketplace functionality and payment transactions.
- Integrated Supabase, Google APIs, PayFast and Resend to support backend services, location-based functionality, payments and transactional communication.
- Took the platform from an initial software project toward a real business by onboarding users and testing the solution with real-world customers.
- Current outcome: Functional platform with active customer onboarding and payment infrastructure prepared for commercial transactions.

DP Aluminium — Full-Stack Web Developer

HTML5 · CSS3 · Tailwind CSS · JavaScript · Cloudflare

- Addressed a client's limited online visibility by translating business requirements into a professional web presence.
- Managed the complete development lifecycle, including requirements gathering, UI design, development, deployment and domain/DNS configuration.
- Overcame first-time deployment and DNS configuration challenges through research and iterative troubleshooting.
- Delivered the website successfully, after which the client reported increased customer enquiries and quotation requests.
- Website: khoza-software-solutions.github.io/DP-Aluminum/services.html

Universal Gearhouse — Web Developer

HTML5 · CSS3 · Tailwind CSS · JavaScript

- Developed a professional website to strengthen the company's online presence and provide customers with accessible information about its services and offerings.
- Managed the project from initial concept through interface design, implementation and deployment.
- Applied responsive web-development practices to create an accessible experience across different screen sizes.
- Website: khoza-software-solutions.github.io/Universal-Gearhouse/

Buy-All — Hackathon Project

HTML5 · CSS3 · Tailwind CSS · JavaScript · APIs

- Identified the inconvenience of requiring users to navigate multiple shopping applications across categories such as food, vehicles, property and wholesale.
- Designed and developed a centralised shopping-platform prototype that aggregates multiple categories into a single interface.
- Built the initial dynamic website from scratch in under 24 hours during the Telkom Hackathon 2025.
- Researched and identified external APIs capable of supporting integration with different services within the platform.
- Website: khoza-software-solutions.github.io/Buy-all/

KhulaFund — UI/UX & Front-End Developer

HTML5 · CSS3 · Tailwind CSS · JavaScript

- Contributed to a platform concept designed to connect investors with South African SMEs seeking growth capital.
- Collaborated with a team during the IBM Z Datathon 2025, focusing on UI/UX design and front-end development.
- Translated the product vision into the initial interface and developed the homepage and core user-facing features.
- Overcame initial UI/UX design challenges through iterative design and visual planning to establish a consistent interface.
- Website: khoza-software-solutions.github.io/KhulaFund/

Personal Portfolio — Developer

JavaScript · TypeScript · Supabase · Jotform AI · Vercel

- Designed and developed a personal portfolio to showcase software projects, technical capabilities and professional development.
- Implemented Supabase functionality and integrated an AI agent to extend the site's interactive capabilities.
- Used AI-assisted development throughout the project while independently integrating, testing and adapting the resulting solutions.
- Website: michael-portfolio-amber.vercel.app

EDUCATION

Diploma in Computer Science (Extended)
Tshwane University of Technology

ACHIEVEMENTS & CERTIFICATES

- 3rd Place — Hult Prize Internal Rounds, Agri-Ally
- Full Stack Development Certificate
- IBM SkillsBuild Cybersecurity Certificate
